

FABRIC FILLER INSTALLATION

Use these instructions to install fabric filler onto an end cap. Read and follow these instructions along with the standard instructions carefully before installing or using tarp system.

NOTICE TO INSTALLER: Even if familiar with product, read instructions prior to installation as improvements may be made without notice. Always handle components with care. If you have questions or problems, call customer service. When done, these instructions must be given to the consumer.

NOTICE TO CONSUMER: Before using this product, read special instructions. Save these instructions for future reference.

PREPARATION

COMPONENTS

- (10) Drive rivets
- Weather seal
- Fabric filler with hardware
- Rope channel bracket
- Tarp straps (optional)
- Bolt-on D-rings with hardware (optional)

TOOLS NEEDED

- Ladder
- Drill with 7/32" and 5/16" bit
- 9/16" socket and wrench
- Hammer
- Cutting tool
- Alcohol
- Protective eyewear

▲ CAUTION: Do not stand or walk on end cap or fabric filler.

STAINLESS STEEL HARDWARE ONLY

▲ CAUTION: To avoid galling of stainless steel hardware, use anti-galling spray, grease or lubricant on threads and avoid high speed when fastening. Do not use impact tools for stainless steel hardware.

A. Turn 3/8" x 1" non-stainless steel self-threading bolt in 5/16" hole to cut threads, then turn back out.

B. Turn 3/8" x 1" stainless steel bolt in for attachment. When possible, use stainless steel nuts and washers with these bolts.

1: APPLY SEAL AND ROPE CHANNEL BRACKET

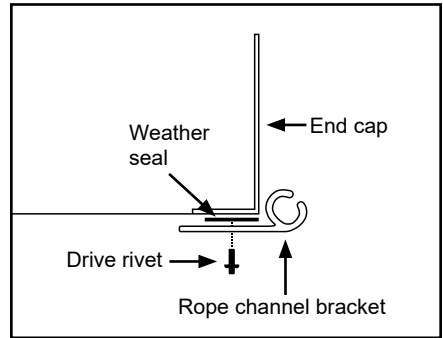

NOTE: For best adhesion, ensure air and surface temperatures are above 60° F.

A. Clean bottom lip of end cap with alcohol, then test fit weather seal and trim if needed.

B. Peel protective backing and adhere weather seal to cleaned area.

NOTE: Trim rope channel bracket flush with end cap if needed.

C. Align rope channel bracket with opening facing up to bottom lip of end cap, then drill (10) 7/32" holes evenly spaced through rope channel bracket and end cap. Insert rivets, then ensure rivets are fully seated and set with hammer.

2: ATTACH TO BOX

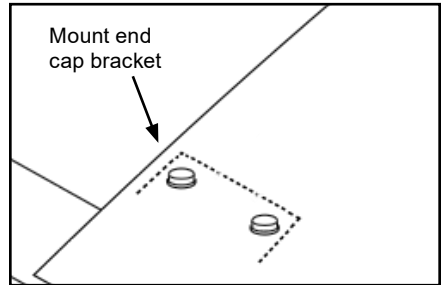

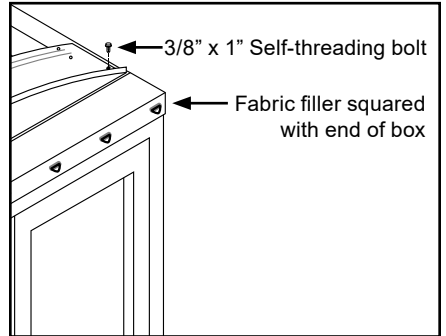

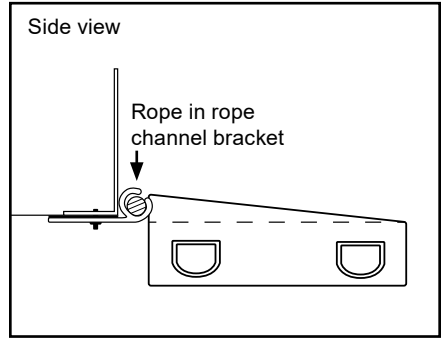

A. Slide fabric filler rope into rope channel bracket on end cap.

B. Align end cap and fabric filler square with end of box, allowing fabric filler sides to hang over edges.

C. Press down end cap to compress weather seal.

D. While pressing down, drill 5/16" hole next to wind deflector into top of box on each side of end cap and fasten with 3/8" x 1" self-threading bolt.

E. Use standard instructions to mount end cap brackets.

3: TARP STRAPS

Perform one of the following to attach and secure tarp straps:

NOTE: For stainless steel hardware, see page 2 for bolting procedures.

SECURE USING BOLT-ON D-RINGS (OPTIONAL)

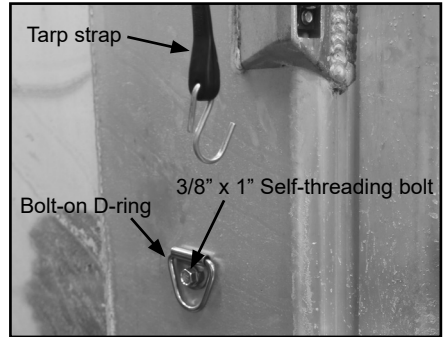

A. Attach tarp straps to D-rings on fabric filler.

B. Mark suitable locations on box and drill $5/16$ " hole at each location, then install bolt-on D-rings and secure with $3/8$ " x 1" self-threading bolts.

NOTE: Ensure tarp strap will be tight when attached to bolt-on D-ring before drilling.

NOTE: If installing bolt-on D-rings to thin walled box, use flat washer, lock washer and lock nut.

C. Pull tarp straps tight and attach to bolt-on D-rings.

SECURE USING BOX LOCATIONS (WITHOUT BOLT-ON D-RINGS)

A. Attach tarp straps to D-rings on fabric filler.

B. Pull tarp straps tight and attach to suitable locations on box.
